

We-People

Planet Funk

We
It's been a while but we've been gathering
We
See the light beyond the walls
We
We've come this far but tonight we will take no more
The time for change is now
So come together now
Come together right now
We
The People
We'll do anything we have to do
For We
The people
There's no one else to answer to
For years and years without a word without a voice to make us heard
But we, the people, are getting ill
We
The People
We
The People
We
Oh I know we're strong but we're suffering
We, with beating hearts behind the walls
We
We've come this far but tonight we will take no more
The time for change is now
So come together now
Come together right now
We
The People
We'll do anything we have to do
For We
The people
There's no one else to answer to
For years and years without a word without a voice to make us heard
But we, the people, are getting ill
We
The People
We
The People
