Sleeplessly sitting idly
I've been dreaming of what I'm doing now
Trapped in an unknown trajectory
Everyday was the same unknown
I was afraid of tomorrow's me

Shining star
Find the star in the universe

I'll protect you, whole life
Meeting a light across the Milky Way
I'll stay with you in your life
After a few light years, I finally got to see you
When the dark night comes, I believe the door will open
Be in the moment
With you at 12:32 oh, oh
12:32 oh
12:32

No matter who you are
Forever on your side
'Cause you revealed the meaning of this existence of mine
Now I'll be your star and I'll make sure that you know
I'll be your cozy place to rest
See you there yesterday, good night
Following you, I'll sleep tight too
My eyes are closing slowly

Shining star
Find the star in the universe

I'll protect you, whole life
Meeting a light across the Milky Way
I'll stay with you in your life
After a few light years, I finally got to see you
When the dark night comes, I believe the door will open
Be in the moment
With you at 12:32 oh
12:32 oh
12:32 oh, oh

I could be an astronaut, girl
And you could be my star
Of Asterum boy
Hold you in my arms

I'll protect you, whole life
I'll protect you
I'll stay with you in your life
After a few light years, I finally got to see you
When the dark night comes, I believe the door will open
Be in the moment
With you at 12:32 oh, oh
