Remember California

Plug in Stereo

I'm on your side
Don't point your fingers at me
(Because you know where this is going)
You know I've tried
But you don't seem to believe me
(And finally it's showing)

You always fight
And it's always with me
(And you always end up crying)
If our love was a dance
Then you'd have two left feet
(Now I never see you smiling)

We're going downhill
And you say it's my fault
But it's not true
So just remember California
Where I left it all for you

We're going downhill
And you say it's my fault
But it's not true
So just remember California
Where I left it all for you

We started out great
So what the hell happened to us
(Oh I wish you would tell me)
And as the years have passed by
You've lost your love and trust
(When will you stop yelling)

I didn't want
For it to got this way
(Please don't say you're leaving)
Could I have done better
I'll do anything to makes you stay
(Why won't you believe me)

We're going downhill
And you say it's my fault
But it's not true
So just remember California
Where I left it all for you

We're going downhill
And you say it's my fault
But it's not true
So just remember California
Where I left it all for you
