Nothing Left To Lose

Point North

Everyone seems like they know more than us
But it's a front for everything they cover up
Ain't it fun to call them out on all their bluffs
And one by one we'll show them what they really are
They don't see the differences in you and me
Sets us apart from whoever they try to be
So disregard the logic that they try to preach
And then we'll leave but

Where we gonna go when there's no escape
We should see this through now for our own sake
So take another step and feel the ground shake
You don't gotta fake you wanna run

Hey, don't surrender now
We still got a chance we can make it out
Hey, you should stick around
Cause no one changed the game when they were by themself
We got nothing left to lose
And we got everything to prove

All we got is something they already lost
They should have fought while we were always holding on
It's worth a shot and they don't even know the cost
And one by one they'll smile with their fingers crossed
So never listen to a word they say
They'll say what you want until they get their way
So trust the things you know
That I'm never letting go

Hey, don't surrender now
We still got a chance we can make it out
Hey, you should stick around
Cause no one changed the game when they were by themself
We got nothing left to lose
And we got everything to prove

Where we gonna go when there's no escape
We should see this through now for our own sake
So take another step and feel the ground shake
You don't gotta fake you wanna run

I don't think you ever knew your own strength
Always keep your comfort at an arms length
So take another step and feel the ground shake
It could give you what you'd always want
There's no reason left for you to run

Hey, don't surrender now
We still got a chance we can make it out
Hey, you should stick around
Cause no one changed the game when they were by themself
Hey, don't surrender now
We still got a chance we can make it out
Hey, you should stick around
Cause no one changed the game when they were by themself

We got nothing left to lose
And we got everything to prove
