

## NEVER LET IT

Poo Bear

Think I'd ever let it down  
Think I'd ever let it down  
Think I'd ever let it down  
Did you think I'd ever let it down  
Do you see anything normal 'bout me, think I'm from here  
When you come around can you tell the difference in the atmosphere  
Think I'd ever let it down  
Did you think I'd ever let it down

If there ever was a question of, whether I show up, whether you  
glow up, you just havin' faith ain't enough  
Take your body and roll up, flick a lighter and smoke up  
I come wit' a warranty, your investment's safe  
I'll make you priority, you're all that's on my plate  
Some say it's mythology the way I love to wait, the way I hold  
it back, to make sure that's you're straight

Think I'd ever let it down  
Think I'd ever let it down  
Think I'd ever let it down  
Did you think I'd ever let it down  
Do you see anything normal 'bout me, think I'm from here  
When you come around can you tell the difference in the atmosphere  
Think I'd ever let it down  
Did you think I'd ever let it down

Gotta stay focused wit' a whole lotta passion, gotta stay patient  
wit' a whole lotta action  
Gotta be aggressive but selfless, gentle but reckless for your  
mental wellness  
I come wit' a warranty, your investment's safe  
I'll make you priority, you're all that's on my plate  
Some say it's mythology the way I love to wait, the way I hold  
it back, to make sure that's you're straight

Think I'd ever let it down  
Think I'd ever let it down  
Think I'd ever let it down  
Did you think I'd ever let it down  
Do you see anything normal 'bout me, think I'm from here  
When you come around can you tell the difference in the atmosphere  
Think I'd ever let it down  
Did you think I'd ever let it down

Wouldn't embarrass myself, wouldn't lead you on, don't depend o

n no one else, I'm that one of one  
One of one I get it done, till the moon turn into the sun, I'm  
puttin' it down, come second to none, it's on sight like we're  
under the gun, chasin' all them dreams now we're on the run  
Like every ending we just begun, just begun
