

Everything Is Gone

POP ETC

Now where do we go
From here it's packed to the brim and
Along the road we march
Our bursting pockets were burning our hell
Then another one stands
Face down in the mud, ah
Brothers are alone
Our family is cutting corners

When everything is gone
Will we still wonder what went wrong?

I'm beating my drums
But no one's come to heed the call
All swallowed up
Suffocated by the weight of the world
And another one stands
Sees that your chain is wearing you out
Once we're left alone
Our names are all forgotten

When everything is gone
Will we still wonder what went wrong?
When everything is gone
Will we still wonder what went wrong?

Where do we go? Oh, oh, oh
Where do we go? Oh, oh, oh
Where do we go? Oh, oh, oh

When everything is gone
Will we still wonder what went wrong?
When everything is gone
Will we still wonder what went wrong?
