

Someone tell me how I got here  
From the city to this frontier  
All the noises join to make harmony

I was stranded on an island  
Where I'd roam without direction  
Is that the wind lifting me up?

Spirits flying at the speed of light (at the speed of light)  
Traveling like a dream one night  
This hole in my heart is proof of life

Life goes on, and the people sing their song  
Love and hate, together, they can make harmony

Plunging back into the darkness  
It's not pain, it's just uncertainty  
I know my heart's missing a piece, but it still beats
