

# Please, Don't Forget Me

POP ETC

You're running on empty, I know  
My sights are set on a place you can't go  
Remember the good times we had  
Please don't pretend that it was all bad  
'Cause the future's getting better all the time  
And the past, it is getting poorer all the time

So please, don't forget me  
I know I fucked up in the end and we can never be friends  
But please, don't forget me  
It isn't hard to understand why we can't hold on to what we had  
But please, don't forget me

You're finding a way to move on  
I know my place in your heart is long gone, it's long gone  
But the earth keeps spinning around  
It doesn't stop when you're crashing down

So please, don't forget me  
I know I fucked up in the end and we can never be friends  
But please, don't forget me  
It isn't hard to understand why we can't hold on to what we had  
Please, don't forget me  
Please, don't forget me  
Please...
