

You say I'm on your side I'm trying to help you
You say you got answers you're gonna help me through
But I love this darkness in your heart
But we're both content to play our parts
'Cause you've got that vice that I like
No matter how hard I fight, it takes a hold of me
Every time that I say it's the last before I know that I'm back
It takes a hold of me right now
I can't get it off, say I've made up my mind
But there's something in my blood that makes me cross those lines
And I love this darkness in my heart
But we're both content to play our parts
'Cause you've got that vice that I like

No matter how hard I fight, it takes a hold of me
Every time that I say it's the last before I know that I'm back
It takes a hold of me right now
It takes a hold of me right now
And I love this darkness in your heart
But we're both content to play our parts
'Cause you've got that vice that I like
No matter how hard I fight it takes a hold of me
Every time that I say it's the last before I know that I'm back
It takes a hold of me right now
