Circles

Pop Evil

Wake up, wide eyed
Free falling dying to survive
This place, this time
Every moment we define

Spinning 'round to write the story of lives
Leaving darkness behind

All the chapters, they come and they go
The pain will fade before you know
All the pages we tear out alone
But running in circles brings you home

Stop running, you can't stop running
You won't wake up 'til you see what's in front of you
All the walls that came unglued
All the words you can't undo so go

Can't get out of your, can't get out of your head
Cause what goes around comes back from the dead

All the chapters, they come and they go
The pain will fade before you know
All the pages we tear out alone
But running in circles brings you home
Circles, keep running in circles
But running in circles brings you home
All the pages we tear out alone
But running in circles brings you home

Follow the circle
Follow the circle

All the chapters, they come and they go
The pain will fade before you know
All the pages we tear out alone
But running in circles brings you home
Circles, keep running in circles
But running in circles brings you home
All the pages we tear out alone
But running in circles brings you home
