

Human Nature

Pop Evil

I laid awake, I laid awake
I made my way when everybody told me to stop
I had to change, I had to change
I had to dig my way out to find my way to the top
I've been deceived, I've been deceived
I had to punch my way out to take a shot in the dark
So I believed, I still believe
I had to learn how to swim to jump back in with the sharks

If the world's on fire
I like the way it burns
If the world's on fire
I like the way it burns

Are we victims of our human nature?
So addicted to the same behavior
If we're ever gonna find a Savior
We need to look inside our human nature
Our human nature
Human nature

Just wanna feel, we wanna feel
But to feel alive, we need to open our eyes
If this is real, could it be real?
We need to all wake up, stop living the lies

If the world's on fire
I like the way it burns
If the world's on fire
I like the way it burns

Are we victims of our human nature?
So addicted to the same behavior
If we're ever gonna find a Savior
We need to look inside our human nature
Our human nature
Human nature

Our human nature
Human nature
Our human nature
Human nature

(Are we victims of our) human nature?
(So addicted to the) human nature
(If we're ever gonna) human nature
(We need to look inside our) human nature
Human nature
