

## Side Effects

Pop Evil

Side effects follow but you'd never know  
Dizzy and numb, I lost control

Day after day, you hid behind the dark  
The world I built you tried to tear apart  
You left me alone for dead  
The coffin buried inside your head

Thought I'd never escape what's said  
But now you spoke too soon  
For all the chaos, for all the time lost  
It wasn't worth the cost

Why did I fight so hard for you?  
Under the surface, all the abuse  
Why did I try so hard to prove  
What's killing you is killing me too?  
No matter what I say, no matter what I do  
You can't deny the truth  
No matter what I say, no matter what I do  
The side effect is you

The side effect is you

Deep within, underneath  
You destroyed and I buried  
The bitter pill no one sees  
The cross of yours that I carried

The web you spun  
You cannot outrun  
For all the chaos, for all the time lost  
You weren't worth the cost

Why did I fight so hard for you?  
Under the surface, all the abuse  
Why did I try so hard to prove  
What's killing you is killing me too?  
No matter what I say, no matter what I do  
You can't deny the truth  
No matter what I say, no matter what I do  
The side effect is you

Here's the web you spun, bad intentions can't run  
Here's the web you spun, what's done is done

Why did I fight so hard for you?  
Under the surface, all the abuse  
Why did I try so hard to prove  
What's killing you is killing me too?  
No matter what I say, no matter what I do  
You can't deny the truth  
No matter what I say, no matter what I do  
The side effect is you  
The side effect is you  
The side effect is you
