Love's just the word for boy meets girl when you know it's fear we've found

You're scared of me and I'm scared of you - we'll never get by without it

The things I do that don't include you, sometimes it grinds you down

I know you'd do anything just to have me around

I never say I love you, I don't think you expect me to But there's no mistaking that special feeling when I'm inside you

When I'm inside you

The fear goes round till it goes bust, it's all so sad about us

The things you've learnt with your fingers burnt Is nothing changes nothing much

I never say I love you, I don't think you expect me to But there's no mistaking that special feeling when I'm inside y ou

When I'm inside you

The things I do don't help me

What can I do - I know it's crazy

But these things are always on my mind when I'm inside you

When I'm inside you (oh yeah)

When I'm inside you
