

On The Level

Poppy

Right into traffic
Driving straight through every light
I've got a habit of ignoring obvious signs
It's so peculiar, who would have guessed?
So what's it to you?
I'm in love, I must confess

I'll put my heart out on display
Now I know that everything's okay
When we're dead and gone, we all decay
But love can carry us until that day

I found someone on the level, level, level, level, level, level
Someone on the level, level, level, level, level, level

So introspective
Right into life, we're taking a bite
It's all progressive
Take me along for every ride

I'll put my heart out on display
Now I know that everything's okay
When we're dead and gone, we all decay
But love can carry us until that day

Found someone on the level, level, level, level, level, level
Someone on the level, level, level, level, level, level
It's so peculiar
I found someone on the level, level, level, level, level, level

When we're dead and gone, we all decay
But love can carry us until that day
When we're dead and gone, we all decay
But love can carry us until that day

I found someone on the level, level, level, level, level, level
Someone on the level, level, level, level, level, level
It's so peculiar
I found someone on the level, level, level, level, level, level
