

Stagger

Poppy

A crisis without a cause
Faith put in a false God
A misstep of emoting
I'm trying to get to where I'm going
A new way to call it off
You leaned in when I told you to stop
My heart is now imploding
I'm trying to get to where I'm going

Stagger on through life backwards
You stagger on through life backwards
Backwards, backwards

You're quite the oppositionist
So your habits you're not trying to quit
Out of fear and loathing
I'm just trying to get to where I'm going
You see that mountain is just a cliff
And I can't talk you down from it
The road home is eroding
And I'm just trying to get to where I'm going

Stagger on through life backwards
You stagger on through life backwards
Backwards, backwards

Stagger on through life backwards
You stagger on through life backwards
Backwards, backwards, backwards
