

Power and Glory

Powerwolf

So many times we were searching for the way
To the land where we can live one day
We went ahead through the wind and rain
No longer will our hearts be full of pain

Now we are here to open up the gate
Now we are here, for you it's not too late

With power and glory, we are coming home
With power and glory, escape from slavery

The time has come to look inside our hearts
The gate is open now so we can start
Take you across like the man from Bethlehem
And with the sign of victory we will follow him

Now we are here to open up the gate
Now we are here, for you it's not too late

With power and glory, we are coming home
With power and glory, escape from slavery

Evil is strong and everywhere
So children of love must take care
It comes with black angels
And tempts you to sin
Be careful tonight
The devil fights hard to win

With power and glory, we are coming home
With power and glory, escape from slavery

Now we are here to open up the gate
Now we are here, for you it's not too late

With power and glory, we are coming home
With power and glory, we are not alone
With power and glory, escape from slavery
Escape from slavery
Escape from slavery
