

Testament in Black

Powerwolf

Can't find the testament
Can't find the testament
Can't find the testament in black

Can't find the testament
Can't find the testament
Can't find the testament in black

We came to kill
We follow the night
We bring the call of the dark

Against your will
The army of Christ
Has taken over the arch

And in the sacristy
They speak your destiny
And on the war they embark

The curse of the omen that carries my name
The burden embraced in my heart

Religion is more than all fortune and fame
And never we wait for the part

Can't find the testament
Can't find the testament
Can't find the testament in black
(Black!)

Can't find the testament
Can't find the testament
Can't find the testament in black

Unholy night
The crossroad to hell
No final mass, no repent

Out of control
Damnation you tell
Enwind the blood on your hands

They hear the terror screams
And break the seven seals
And in the war they will stand

The lawyers of Christ and the right to defend
?

The cardinal pulse of the call of the end
The storm of the dark has begun

Can you read the testament?
Can you read the testament?
Look in my eyes

Can you read the testament?
Can you read the testament?
Look in my eyes

Oh, testament, testament in black
Oh, testament, testament in black
Testament, testament in black
