

(Hey old friend  
How has everything been?  
Do you still have the memories from then?  
Hey old friend)

I hate that you listen to garbage  
I can't even leave my apartment  
Spent two nights in the darkness  
Wanna live another year, but I know that's a bargain  
Prepare for the harvest, these nights are the hardest  
Take what you need then leave me in the garden  
I'll build a hideout where no one can find me  
Under the stars, but none of them shining

Never let it sit, never let it sink in  
I don't wanna think, I've been staying distant  
I don't wanna know, only thing I know now  
I ain't falling in love to fall out  
Never let it sit, never let it sink in  
I don't wanna think, I've been staying distant  
I don't wanna know, only thing I know now  
I ain't falling in love to fall out

Met you for the first time at one of my shows  
Didn't think much of that night we spoke  
Now looking back, didn't miss one note  
Found a new home when you wore my coat  
Girl, you the last I expected  
Knife in my chest, tears on my cheeks  
I won't go out for "I don't bother"  
Said all I had, then cut off my tongue  
Why is it hard saying bye to a monster?

How has everything been?

Yeah, six pills, I don't know what I'm drinkin'  
But I know I don't know what I think, uh

My world feel like it's sinkin'  
On and on, I'm sick again  
Ten roads, I don't know what I'm thinkin'  
But I know I don't want this choice  
I blame you that my life's in a spiral  
But right now I got no one to dial
