

throw it all away

Powfu

If you want we can both be friends
We can makeout til the the school year ends
Life is better when you got no plans
Throw it all away while we holding hands

If you want you can be my girl
We can runaway find a whole new world
I don't really care tell me what you think
I won't be here when the whole town sinks

Did I eat some butterflies
U got me nervous
Baby you're so hot
Like ouch I'm talkin to a furnace

Open up my heart
Like if you were a surgeon
Babe let's pack the bags
Let's book a trip like this is urgent

Put on that favourite sundress
The one you wore when we met
Strawberry fields in your head
On my chest

Make me have to smile when
I don't wanna
See you in the halls
And I'm tryin to holla
Baby can you be my best friend
Tryin to find somebody 'fore the world ends
And I want it to be you
And I want it to be you
And I want it to be you

If you want we can both be friends
We can makeout til the the school year ends
Life is better when you got no plans
Throw it all away while we holding hands
