

## With You

Pretty Sick

Tell me your secrets  
I swear I won't deep it  
There's something between us  
Everything I'm feeling  
You love and you learn it  
With you, I'm determined  
You're not just a lesson  
I know I deserve it

It's hard and it's work, but  
You're my kind of pervert  
Let's do it together  
These bridges won't burn themselves

These bridges won't burn themselves  
With you  
These bridges won't burn  
With you, you  
Won't burn themselves  
With you, you  
With you, you  
With you, you

I want to take you home to parents  
You're good on paper, so let's share it  
I'm sick of having to give answers  
I'm sick of other people's anxious  
You'll be the moon, I'll be your ocean  
Your word is my will, leave none unspoken  
Been waiting for you, I been hopin'  
As natural as the passing seasons  
I'll pray for you to gods above me  
I'll write you songs until you love me

Until you love me  
You  
Until you love me  
You  
With you, you  
Until you love me  
With you, you  
Until you love me
