

Move

Pretty Vicious

A long night tonight (I'll tell you why)
'Cause the mood's feeling right (Oh my, oh my)
'Cause it's all alright when the clock strikes nine
But it all goes wild when it 'comes midnight

You gotta move baby, move baby (La da da da)
You gotta move baby, move baby (La da da da)
'Cause it all goes wild when it 'comes midnight
So move baby, move

If you want it come and get it, look me up and come around
If you want it come and get it, shake it off and let it out
So (Move baby, move baby), jump around
Move baby, move baby, let it out
If you want it come and get it, look me up and come around
If you want it come and get it, shake it off and let it out
So (Move baby, move baby), jump around
(Move baby, move baby), let it out

Bold choice to make
But I'm glad that you came
'Cause all this noise drives me insane
But it all went wild then she walked in

'Cause she moves baby, moves baby (La da da da)
You gotta move baby, move baby (La da da da)
'Cause it all goes wild when it 'comes midnight
So move baby, move

If you want it come and get it, look me up and come around
If you want it come and get it, shake it off and let it out
So (Move baby, move baby), jump around
Move baby, move baby, let it out
If you want it come and get it, look me up and come around
If you want it come and get it, shake it off and let it out
So (Move baby, move baby), jump around
(Move baby, move baby), let it out

And all she has is all she needs
'Cause all she has is all she needs
And then the noise, the noise, it makes me feel free
The noise, the noise, it makes me feel free
'Cause music is my one release, the music is my one release
Release, release, release me
Release, release, release
Move

Move baby, move baby, jump around
Move baby, move baby, let it out
If you want it come and get it, look me up and come around
If you want it come and get it, shake it off and let it out
So (Move baby, move baby), jump around
(Move baby, move baby), let it out
