

I wander a wasteland  
Nuclear winter plagues what I once called my home  
How did it come to this?  
How did we come to this?

Toxic air tears a hole in my lungs  
All that I've known is dismembered or completely  
Disintegrated  
All that I had is now broken and

Gone are the days of stability  
War never changes and hatred remains just the same  
We don't deserve a second chance here  
Wipe the slate clean

Gaia, if you can hear my plea;  
Shatter the earth and dismantle the sea  
Burn down the structures, ignite monuments  
Shatter the bones of the worthless and ignorant  
If you can hear these words  
If my cause is known  
Take back the life from the fabrics you've sewn  
Take back all that you rightfully own

Reclaim the Earth

Virtues long lost with evolution  
Genocide reigns over constitution  
If you can hear my plea  
Shatter the earth, dismantle the sea

Gaia, if you can hear my plea;  
Shatter the earth and dismantle the sea  
Burn down the structures, ignite monuments  
Shatter the bones of the worthless and ignorant  
If you can hear these words  
If my cause is known  
Take back the life from the fabrics you've sewn  
Take back all that you rightfully own

Take back the life from the fabrics you've sewn  
Gaia reverse all the damage we've done  
Take back all that you rightfully own

I wander a wasteland  
Nuclear winter plagues what I once called my home  
How did it come to this?  
How did we come to this?

Toxic air tears a hole in my lungs  
All that I've known is dismembered or completely  
Disintegrated  
All that I had is now broken and gone
