

# The Sulfur Inside Your Hell

Pridelands

This feels so alien, I confess  
It's clutching onto me, so hard that I can't breathe  
A rush straight through my body, the sinking feeling shooting up from underneath  
Wondering what shape your gonna take tonight  
But your somewhere in the scape of sound  
We'll find a way to subjugate the pain, oh I can feel you in my veins

Please come out from hiding, I've been waiting for you  
Disclose who you are  
Please come out from hiding, I've been waiting here for you all night, just show yourself  
Disclose who you are  
Good God, I can taste the sulfur inside your hell

What will you whisper to me to tear me apart?  
Promise me you'll play tricks this time, you know that's what I like  
And now I've lost my mind  
I've heard your voice inside me too many times, I've tried

I've tried keeping my distance  
Continued faking indifference  
But I can't stand to be untethered from your presence for too long  
This feels so alien I confess  
It's clutching onto me so hard that I can't breathe

This feels so alien, it's clutching onto me so hard that I can't breathe

What will you whisper to me to tear me apart?  
Promise me you'll play tricks this time, you know that's what I like  
And now I've lost my mind  
I've heard your voice inside me too many times, I've tried
