

# Don't Say You've Never Been Warned

Primal Fear

You've got the taste of hell  
You felt the sense of power  
And now you're coming back for more  
You know there's no return  
And you would rather burn  
Choose the life you've lived before

I will break out better watch out  
Look into the flames there's no doubt  
You will blackout when I rise

There's a way to live there's a way to die  
Watch me fear me I can make you fly  
There's a way to win and a way to lose  
Listen closely I bury you alive  
Don't say you've never been warned

You got the taste of blood  
You just can't get enough  
And now it's time to call the beast  
You can't control your lust  
Crawling through the dust  
Now you're out and you are free

I will break out better watch out  
Look into the flames there's no doubt  
You will blackout when I rise

There's a way to live there's a way to die  
Watch me fear me I can make you fly  
There's a way to win and a way to lose  
Listen closely I bury you alive  
Don't say you've never been warned

I will break out better watch out  
Look into the flames there's no doubt  
You will blackout when I rise

There's a way to live there's a way to die  
Watch me fear me I can make you fly  
There's a way to win and a way to lose  
Listen closely I bury you alive  
There's a way to live there's a way to die  
Watch me fear me I can make you fly  
There's a way to win and a way to lose  
Listen closely I bury you alive  
Don't say you've never been warned
