

Predator

Primal Fear

Face to face
And eye to eye
The days of winter arise

Bloodtrails across the snow
To hell and back not long ago
Predator's prayer in the cold

I live on the other side
I can make you scream

There's no escape
What can be killed
No one can stop
The predator
Look in his eyes
And no more prayers
Until the end
The preadataor is on the rise

Soak in the night
Demons alive
To finish all creation

He never saw the sun
And all the damage done
There's something out there waiting

I be the wrath and all succeed
I someday I will be free

There's no escape
What can be killed
No one can stop
The predator
Look in his eyes
And no more prayers
Until the end
The preadataor is on the rise

There's no escape
What can be killed
No one can stop
The predator
Look in his eyes
And no more prayers
Until the end
The preadataor is on the rise

Is on the rise
Like you scream
The predator is on the rise
