

Chase It Down

Primal Scream

Time slips away
Day after day
And I don't even love you
Anymore
Anymore

Love while you can
Every woman every man
Everybody is a star
No matter who
Or what you are
And we don't have too long
Run your race
Sing your song

Free fall from the love
Who is gonna come and save us now?
Key turn on the door
Show me if you really want this love
We love on and on
I have never seen this problem solved
Keep word and move on
Hold on to your dream and sing this song

Look for the peace
Noise will not cease
In the chaos
There is beauty
Chase it down
Chase it down
And we don't have too long
Run your race
Sing your song
And we don't have too long
Run your race
Sing your song

Free fall from the love
Who is gonna come and save us now?
Key turn on the door
Show me if you really want this love
We love on and on
I have never seen this problem solved
Keep word and move on
Hold on to your dream and sing this song

And we can chase it down
And we can chase it down

And I don't even love you anymore
And I don't even love you anymore
And I don't even love you anymore
And I don't even love you anymore
