

Three Small Blue Lights

Primitive Radio Gods

Three small blue lights that are falling tonight
I guess I'll let them in tonight
I'll keep them nice to live
It lets you strive them, we have to believe
There's nothing better we could do
That you've been deadly clean

Is it time we wonder what we've been like you
Just in life, we share these living off the work
These lights take me falling and living down the hall
Check out these shattered dreams we've had

Two little yellow wrens that are warbling today
I must stow up in flames for me
They could be nice to me
So bright the light brings a masquerade to me
It's something better we could do
There's nothing dead to leave

Is it time we wonder what we've been like you
Just in life, we share these living off the work
These lights take me falling and living down the hall
Check out these shattered dreams we've had
