

Problem

Prince Fox

Every sorry that you said
I know you didn't mean
Everything that's wrong with you
You put it all on me

Put it down on me
Cuz you been down for a minute
Put the blame on me
I don't know how to fix it

Everything is not about you
I can't be your crutch
I can't fight these battles for you
My life is enough

You're my problem
And I'm running away from you
You're my problem
And I'm running away, running away
You're my problem
And I'm running away from you
You're my problem
And I'm running away from you

I'm almost out breath
And tired of hearing how
Your day is going west
And steering mine south

Put it down on me
Cuz you been down for a minute
Put the blame on me
Too blind to admit it

Everything is not about you
I can't be your crutch
I can't fight these battles for you
My life is enough

You're my problem
And I'm running away from you
You're my problem
And I'm running away, running away
You're my problem
And I'm running away from you
You're my problem
And I'm running away from you

You're my problem
You're my problem
I can't get away from you

You're my problem
And I'm running away from you
You're my problem
And I'm running away, running away
You're my problem

And I'm running away from you
You're my problem
And I'm running away from you
