

I Love My Boyfriend

Princess Chelsea

There is a boy I know
We are friends, we are more than
'Cause every time he looks at me I get electric shocks
In my brain and in my heart
But he is not the one I love

Still every time I look into his pretty eyes
I think of all the things I didn't even try
And though I know that it is only chemistry
There's nothing in the world that I can do about it

But I love my boyfriend
He is good to me, he's a good man
He takes care of me when I need it
He's the one I want to have children with

But every time I close my eyes I think of him
And all the things I didn't even do with him
And though I know that it is only chemistry
There's nothing in the world that I can do about it

Ten years do I have to worry
I considered leaving for a guy that hates money
I get bored, what a bummer
Craving the attention of a blazed-out drummer

Time moves fast, it's the year of the election
The blush-inducing rush of another man's affection
I don't care, I don't even know
I suppose I just wanted the attention

But I love my boyfriend
He is good to me, he's a good man
He takes care of me wherever I am
He's the one I want to have children with

Yeah, I love my boyfriend
(Every time I look into his pretty eyes)
And he loves me wherever I am
(I think of all the things I didn't even try)
He is kind to me, he's a good man
(And though I know that it is only chemistry)
And there is nothing in the world I wouldn't do for him
(There's nothing in the world I wouldn't do for him)
Yeah
