

Push You Away

Princess Superstar

No, this is finished
Do you hear me?
It is over
I'm so fuckin done
I'm so sick of this fuckin relationship

Right now I can't stand you, I'm doing what you can't do
I banned you, leaving you spring break is in Cancun
I plan to get another man and hand you
Back it up and down move, turn it away, watch my up and down boobs
I got a velvet rope wrapped around my brain
Tell my chick to listen up, he don't see your name
Cause you can't get into my club no more
I shut the club, I shut the door, I put up nails and boards

I push you away and then you go away aha
I push you away and then you go away aha
I push you away and then you go away aha
I push you away... baby come back, baby baby come on back
Please come back

I'm sick of being patient with it, this ain't a relationship, is it?
It's a relationshit, admit it
So what if it's the best sex I had?
What if you love me? Well, I'm bad
What is your deepest thought? I lift it up, well I feel bad
Oh wait, I think I need you back
Oh no, I take it all back
I was only be of matter, no no no all ups in sec
I miss you, I'm fiendin, your love I need it
I didn't mean it, I was on my period

I push you away and then you go away aha
I push you away and then you go away aha
I push you away and then you go away aha
I push you away... baby come back, baby baby come on back
Please come back

I'm crazy, you're crazy, none of us is sane baby
And I want a baby but what if we make that baby crazy?
If you get another lady, no one's getting out
Safety really would go crazy like I'mma need your bag lady
I'm sorry darling, won't you please come home?
I'll put your real name back into my phone
On the caller ID instead of asshole
It'll say prince callin from the castle
Cause I'm the asshole
Do you remember when we first met?
We stopped and kissed every 5 secs
And how I made us worth the sex
Couldn't keep our hands off each other, like a newborn and a mother
Now we're running from each other, see ya motherfucker
When you met me said that I was like Eve
You said don't go and I went to pee, you didn't want me to leave
Please, don't know what went wrong
What things holding hits on
And what they give me and our kids can sing along

I push you away and then you go away aha
I push you away and then you go away aha
I push you away and then you go away aha
I push you away... baby come back, baby baby come on back
Please come back

Baby come back, baby baby come on back
Please come back
Baby come back, baby baby come on back
Please come back
Oh baby, come back
Baby come back, baby baby come on back (I would never leave you)
Please come back
Baby please come back to me
I can't live without you
Oh
