

Lost Gold

Priory

I'll see you when I get there
Flash a light in your window
Sneak you out your parents' house
Don't bother with a suitcase
We're gonna find a new place
Maybe head down south

We finally made our minds up
Go where they will never find us
Steal away in the night's air
I got a pocket full of quarters
Forget the standing orders
We're gonna make our escape

We'll build a fortress up in the trees
Climb after me, climb after me
We'll make our living out on the seas
There we'll grow old in search of lost gold

We'll stick to the back roads
I get stuck in a map's fold
I take the beach when the tide's low
I steal food from the trees
Stitch our clothes with a tight seam
And take cover in the back seat

This is something all or nothing
Never thought I had a reason
To pull the trigger of a shotgun
This is something all or nothing
Never thought I had a reason
To pull the trigger of a shotgun

They're never gonna find us
They're never gonna find us
They're never gonna find us here

You're never gonna find us
You're never gonna find us
You're never gonna find us here

They're never gonna find us
They're never gonna find us
They're never gonna find us here

They're never gonna find us
They're never gonna find us
They're never gonna find us here

We'll build a fortress up in the trees
Climb after me, climb after me
We'll make our living out on the seas
There we'll grow old in search of lost gold
I'll see you when I get there
Flash a light in your window
