

Deception

Prism

I hear you talkin' all the time
I'm catchin' every word
But the story is the same as the one in your eyes
Who do you think you're foolin'?
Now don't tell me no lies
You're standing on a dark side of your love

Deception
I'm not being fooled by deception
Deception
You thought you could put something over me

What's this I hear around town?
Have you been cheatin' on me?
You better tell me the truth now about love
Stop this guessing game
It's just a slight of heart
When the show is over you can hide

Deception
I'm not being fooled by deception
Deception
It's only illusions of love

(break-solo)
I'm tired of alibis
I want a 'face to face'
I need to know your feelings deep inside
Don't take me part of the way
Baby, show me your love
Now it's so revealing... you can't hide

Deception
I won't be confused by deception
