

When nature sleeps she dreams of you  
In all your ways of life  
Into eternity

She remembers all what was  
And how it all began  
In all your ways of life

Down time's stream to the birth of a heart  
The origin of the dream  
The dream of you

At first despair followed by rage  
And hate begins to eat  
When nature sleeps

When nature dreams she mourns with you  
Her glory rests in you  
Made for eternity

She remembers all what was

And how it all began  
In all your ways of life

Down time's stream to the birth of a heart  
The origin of the dream  
The dream of you

At first despair followed by rage  
And hate begins to eat  
But no one can unthink a thought

When nature sleeps she dreams of you  
In all your ways of life  
Into eternity

When nature sleeps she dreams of you  
In all your ways of life  
Into eternity
