

Dance In The Air

Project Pitchfork

Further than the DNA
But nearer than your love
The smallest hell ever created
Just needs two - it just needs two
And one emotion - a destination
Never ending - never reaching
Endless longing in motion
Open the door a little more

Take a look inside
It ends with your fear
To fall while falling with the fallen
A dance in the air with you
This is a neat little creation of yours
Thanks for asking me in
Without any question who I am
Thanks for asking me in
Without any question who I am
