

## Fear

### Project Pitchfork

There is nothing to fear  
If aggression is the result of fear  
Then fear is the fear of aggression  
So if you are afraid of an aggressor  
You are afraid of a person which is afraid of you  
A person ruled by its fears  
And why should you be afraid of someone  
Who is behaving like a small child in the darkness?

Break the circle we are living in  
And don't be afraid, there's nothing to fear
