

# Solitude

## Project Pitchfork

You and me in extacy  
Show me the light  
Again and again

I feel your love  
But who am I?  
Where am I in this place?

Questions let the mirror break  
Connection stops instantly

I feel your love  
But who am I?  
Where am I in this place?

You've seen my hate  
You've seen my love  
And we survived  
You want to stay  
Where you are now  
I was born right now  
Confusion creates an universe

You've seen my hate  
You've seen my love  
And we survived  
I want to be  
Where you are now  
I was born right now  
My confusion creates your universe

I want to dive into your soul  
Like a being without a form  
You've seen my love  
You've seen my hate  
How did I reach this state?  
Remember, everything stand still  
The morninglight will warm my soul  
I feel your love  
But who am I?  
I want to be by your side
