

Compulsive Future Projection

Prong

With the burden of the past
Compulsive future projection
Creating the anxiety gap
Step out of time dimension

Compulsion to live
Through memory anticipation
Oppressive it is
No certainty of protection
Forget your life situation
Compulsive future projection

No time just this time
It lies in this here moment
Say yes just say yes
Say yes to the present moment

Impressions you give
To everyone that you mention
Oppressive it is
No certainty of protection
Impulsive to live
In continual apprehension
Obsession relived

Staring at the ceiling
Staring at the clock
Future projection

With the burden of the past
Compulsive future projection
You want the insanity back
Your thoughts are your invention

Compulsion to live
Through memory anticipation
Compulsion to miss
No certainty
No protection
In continual apprehension
Obsession relived
Forget your life situation
Compulsive future projection
