

## Almost Pt. 3

### Propaganda

I guess maybe I do know what happens to David  
He ain't extinct after all  
He evolved  
He's me

I guess I did fear David  
In the way we often fear what we know we are becoming  
I understood him quite well

Why is almost so important to me  
I understand how obsession and repulsion live in the same body  
I guess I feared extinction  
And my workaholism is just slowing down atrophy  
Where all actions are just attempts to slow down atrophy

And if God is not one of the funniest people  
Slowing down atrophy only accelerates it

I'm not your problem David  
You're your problem  
So here I am  
I am my David

Staring down the reality that I'm the last of those who played  
outside  
Without the hint of a push notification  
I am the last of the pre-internets  
The dodo birds of AI and quantum computing

But I can be the warm hi-fi vinyl records  
That teach these mp3s there is more than virality  
Turns out you can ask an Endling anything you want

Go look in a mirror
