Anywhere (Anywhere)

I'll tell you what it is, then  
When you find somethin' and it's real

The world is ours, let's go map the stars  
Vacation in a spaceship, you too fly for cars  
Survivin', be the air of Neptune  
That's why we name our daughters after the sun and moon, that's our song (Ye ah)

I heard your dance moves was notorious  
As beautiful as northern lights, were more glorious  
Sometimes the pull of gravity too strong, heh  
We got pride, we got goals, short-term and long, look  
All I'm sayin' is what we made, we gotta sustain  
I love it in yo' galaxy, I'm not one to complain  
We all know the reality, nothing like a Cali girl  
Don't care about no salary, out of this world  
I get DMs from these young artists navigatin' industry  
"Prop, I think that Hollywood is finna be the end of me  
How you keep humility? You ain't crazy so far"  
I tell 'em "Lil' homie, find you a North Star"

Yeah, I would go anywhere (Yeah, I just look up)  
With you, with you (I know you right there, right there)  
You could have anything (Look, I just look up)  
'Cause you are the truth (I know you right there, right there)  
Yeah, I would go anywhere (Yeah, I just look up)

Vacation in a spaceship, you too fly for cars  
Terraformed our own, our own mission to Mars  
Make a livable world for these two daughters of ours  
You ain't got no rivals, brightest in the night sky  
Humbly come up under, no patriarchal title  
Survival in your fibers, I'm just glad to orbit  
The universe sings in a unison chorus  
Sometimes my only thought is "How you get this blessin', Prop?  
It's even good when you bad, you a mess, Prop"  
I look at God like "Homie, you done messed up"  
Gangster in a sky light, and she throw the West up?
