

## C Ur Face

Provoker

Tell myself I'm doing great  
Underestimate all the time it takes  
These days I'm hanging by a thread  
But tell my friends

I don't wanna see your face again  
See your face again  
See your face again  
See your face again  
I don't wanna see your face again

Missing how it all was back then  
It changed but we still remain good friends, I guess  
The way I hide it in my face  
My smile fades

I just wanna see your face again  
See your face again  
See your face again  
See your face again  
I just wanna see your face again

Only your face  
I see only your face bringing pain
