

Little Ghost

Provoker

I had all these feelings when I met you
No one could've lasted what we went through
Too many days undervalued
Thinking bout it now makes me sad too

And now It's all coming back again
I should have savored when I had it
You're really breaking my heart again
Over and over in my head
When it goes away
All the pain remains
Just another face
By another name

Come and push me to the edge
I want all of it
I don't want to say it
I feel bad, it feels good
Baby, push me off the edge
Show me all of it
I like what I'm seeing
I feel bad, it feels good
Come and push me to the edge
I want all of it
I don't want to say it
I feel bad, it feels good
Baby, push me off the edge
Show me all of it
I like what I'm seeing

Now I know exactly what I won't do
Wish I didn't have to learn it from you
Your little ghost payed a visit
And disappeared like I imagined it

The feelings never coming back again
I should have savored when I had them
You're really breaking my heart again
Over and over in my head
When it goes away
All the pain remains
Just another face
By another name

Come and push me to the edge
I want all of it
I don't want to say it
I feel bad, it feels good
Baby, push me off the edge
Show me all of it
I like what I'm seeing
I feel bad, it feels good
Come and push me to the edge
I want all of it
I don't want to say it
I feel bad, it feels good
Baby, push me off the edge

Show me all of it
I like what I'm seeing
