

Static No More

Próxima Parada

I've already been in a black hole
Already stood before a car
Already wrecked a couple of friendships
That didn't get me too far

I've already been out looking for the sunset
It's not even close to noon
Already loved a couple of women
Ain't gonna see them soon

Life, you keep demanding I define you
Everyday you're a puddle creeping from under my fridge
Life, I keep getting my feet wet
Gonna take a look underneath and see what it is

It's easy to think up stories about destruction
It's all we've ever known
You can sing along with King David
Can you find peace on your own?
I'd like to feel how light my feet are
Run 'neath the light of the moon
I wanna see how my heart fares
If I don't run away so soon

Life, you keep demanding I define you
Everyday you're a puddle creeping from under my fridge
Life, I keep getting my feet wet
Gonna take a look underneath and see what it is

When way gives way to nothing
You can always stop there
We're still a ways from nothing today
You decide from here
But I am static no more
