

## ANGEL

PRYVT

Said you'd keep me close to you when I'm figuring out  
I'm down on my knees, praying save me cause I don't really know  
how  
And if it was you let me know how you would go on about

Your promise is long due  
And I know that its killing me, that's alright  
Don't want to wake up from this dream, with you I  
It's more than you see, just need you by my side

You only you, did you know that it's you  
We're getting close even though I know its wrong to do  
You baby you, maybe you, is it you  
You only you, darling you is it you  
We're falling deeper although our time is overdue  
You baby you, maybe you, if it's you

I've had enough, no need to wait  
I'm closing up this chapter of our fate  
I pray you stay with me  
Our love in symphony, echos of what used to be

Your promise is long due  
And I know that its killing me, that's alright  
Don't want to wake up from this dream, with you I  
It's more than you see, just need you by my side

You only you, did you know that it's you  
We're getting close even though I know its wrong to do  
You baby you, maybe you, is it you  
You only you, darling you is it you  
We're falling deeper although our time is overdue  
You baby you, maybe you, if it's you
