

The Well and the Wall

Psapp

I wrote a page
But no one would read
I wore the reins
But no one would lead
I saw a light
Glowing alone
And then a hand
It was guiding me home

You found a cure
Though no one was ill
You bore away
To show me your will
And though you bled
You kept your resolve
I want to be made in your mould

And so I sat
I was burning with shame
And when you called
It wasn't the same
And though you stopped
And waited for me
I knew that I would never leave

Here comes a candle
To light your way
Here comes a bell to ring at your grave
Here comes a finger to count your flaws
Here comes an answer to open the door

Is this a test
Did we already fail
I listened in
Couldn't hear my name
And though I pounded on the door
There was no way
No point anymore

I found a bottomless well
I found a wall I could scale
I found a bottomless well
I found a wall I could scale
