Ganji, take it

Dress up mentally and hold each body
Feel it, get the momentum, run excitedly, hold on tight
It's all a piece of cake, calm down, take it easy
Whenever I'm creating music, I'm a queen rather than a king
Fold your middle finger down
Stretch out your thumb up
I'm a mentally six-pack, turning the music louder, stupid performer
The time when you get jealous of others, please
Developing a charley horse on your barefoot
Don't tantrum or blame others
Change the item please (Please)
I don't need to see the rap lyrics that I can hear well
Deliver it without any accidents
Pronounce the rap in Korean properly
Samadhi is not a female character

Uh, do-re-mi-fa-so-la-shi
Hobbies goes back to my memories
The future of a disrespectful person-
Who doesn't know the past goes to it's goal
Protein that bulks up my paranoia and poison
Let go of the gut feeling by saying "Do this, do that"
Don't say "Do it, don't do it," you can't hear that

Ganji, take it
I got gratitude and attitude

I just answer and do whatever I want
