

# Eternal

Psyche

Blue mist echoes to my past  
The moment I remember my crime  
Regret my anger avenue  
The night wakes me to the day

My heart is dying  
Things will never be the same  
But I add fuel to the fire  
As it burns desire  
We become eternal flame  
And razor sharp the pain

Uncertain presence close my eyes  
Save me from eternal sight  
Broken words permeate the room  
Let the moment never fade away

My heart is dying  
Things will never be the same  
But I add fuel to the fire  
As it burns desire  
We become eternal flame  
And razor sharp the pain

Uncover all the hidden lies  
Imagine we're stars in the sky
