

You're The Only One

Psyche

I first saw you when
You were talking to your friends
And I tried to make you notice me
Then you were alone
And I couldn't hesitate
I said, "I know your love can set me free"
You've got to come along
Cause you know it won't be wrong
Just let me show you what I mean

You're the only one for me
And baby you've just got to believe
You're the only one for me
You're everything I need

You say that I'm obsessed
But you know that I can't rest
Until you've given all your love to me
It will be alright
If I take you home tonight
I'll do everything to make you see
You've got to come along
Cause you know it won't be wrong
Just let me show you what I mean...
