### Psychedelic Porn Crumpets

I woke up at 11:33  
Watched the trailer for a new Christopher Nolan movie  
And it started me thinking I would love to write a script  
One about the world, from an alien ship

Can you clarify if this is real or a design?  
Seeing how the speculators rise up from a Darwinism simulator  
Now they create what we are taught  
Along with every brain that posed a thought  
It's dangerous, it's ill advised, it's basic animal behaviour

I think I'm sticking to my drugs man  
Seems like they're better for my brain than  
What we're prescribed to think from day one  
I'm only choosing love  
I'm only choosing love

Think for yourself it might help your head  
Don't get caught up, it's easy, look straight ahead
