

Change The Colours

Puggy

Show me through you
A thousand ways to Heaven
None look the same
Hear me tell you
Ev'ry breath a whisper
With something to say

It's the shades that make a second last a lifetime
And take us away, eh, eh, eh, eh
You know

I'll change the colours
I'll change the colours
I'll change the colours of your mind
I'll change the colours
One for another
I'll change the colours of your mind

Please
Close your eyes and realise we're more than we seem
And don't you hold on
'Cause gravity don't mind if we'd only let go

I'll change the colours

I'll change the colours
I'll change the colours of your mind
I'll change the colours
From one to another
I'll change the colours of your mind, oh

Oh you know it's never going to be the right time
So let each second light up brighter than a lifetime

I'll change the colours
I'll change the colours
I'll change the colours of your mind
I'll change the colours
I'll change the colours
I'll change the colours of your mind
I'll change the colours
I'll change the colours
I'll change the colours
I'll change the colours of your mind
