

## Enemies

Pulley

I'm feeling hopeless in this tom down world  
I used to call my home

We're the enemies in the world  
We're the enemies in the world

I'm here to lose and never win  
Things always stop when they begin

We're the enemies in the world  
We're the enemies in the world

So when lightning strikes me twice and I can always walk away  
Then I'll stand in place and fight another day  
Always you pointing the finger and hiding in disguise  
Don't they know we see right through the lies?

Sometimes it's quiet,  
I can hear my brain, it's bouncing in my head

We're the enemies in our world  
We're the enemies in our world

There's no one else, no reason,  
what's the point of knowing all my fears?

We're the enemies in our world  
We're the enemies in our world

So when lightning strikes me twice and I can always walk away  
Then I'll stand in place and fight another day  
Always you pointing the finger and hiding in disguise  
Don't they know we see right through the lies?

So when lightning strikes me twice and I can always walk away  
Then I'll stand in place and fight another day  
Always you pointing the finger and hiding in disguise  
Don't they know we see right through the lies?

Can't they feel it?  
Can't they feel it?
